Master Loran Taylor having read enough about aeroplanes to get the contagion of Sunday visiting, he piloted a biplane of his own. And one day last week (no matter about the exact time) he concluded to soar aloft, and partly succeeded, but when he had crossed the creek near his home, some thirty feet in the air, a sudden gust of wind upset the machine and landed Master Loran upon his shoulder. When his father saw the lad he went for the air ship with a hatchet, having no mechanical end in view. Not to be outdone Loran has another one under construction.

At 2 o'clock Sunday afternoon Rev. Winters delivered a learned discourse on "The True Foundation Stone" in which the speaker showed his theological erudition and sincere piety. He was assisted in the sacramental services by Rev. Grimes who announced that he would preach at Franklin Square that night and preach here next Sunday morning and evening.

The faithful ones of Franklin Square and Hart's appointments were here for sacramental services.

These are big words used by the attending physician for which we make no additional charge. A picture was taken of the exposures made by the X-ray machine, which shows the bones of Mrs. Welkart's shoulder and the fractured portion of the humerus. It is hoped that the X-ray will show where to attach the wire in that immediate locality, requiring an indefinite time for nature to do its work. The picture will be of use to satisfy the patient and her friends as to the correctness of the doctor's diagnosis; will be of use to medical science, and can be used before a court and jury in the event of an action for personal damages.

Schoolroom No. 2 became so overcrowded this term that in order to relieve the congestion and give each pupil the amount of fresh air specified by law, the B grade in Miss Sophia Wilson's room were marched to the miners' institute Monday afternoon and placed in charge of Miss Ethel Roberts, a "Ward method" teacher from East Liverpool. Miss Roberts is related to the Wells families of this village, but will make her home in East Liverpool, going back and forth on the Y. & O. electric line. Below are the names of the pupils transferred to the institute, and it will be seen that most of them are upon that side of the Erie track: Leslie Boston, Jerome Barnes, Wm. Barton, Lloyd Carter, Harry Folch, James Falcon, James Fynes, Wm. Grim, Chas. Gilmore, Curtis Grindle, Frank Gurie, Chas. The county commissioners at their meeting in Lisbon Monday afternoon decided to let a contract for the erection of concrete box culverts at bridge site 241 and 242 in Green township, Mahoning county, these to be let jointly by the commissioners of Columbiana and Mahoning, being on the township line road between Washingtonville and Salem. And as a mere suggestion, it will be both wise and economical if E. L. Stouffer is permitted to complete his road working into town.

As was to be expected, the school attendance at the institute is not without its objections, yet there was no better way open before the school board until the new appraisal building can be erected upon the school grounds. All pupils who desire to do so can take their dinners to either place of learning to which they belong, and parents should do all they can to encourage their children to adjust themselves to the new order of things without the need of a tyrant officer or a juvenile court.
